DRAGON 32: RESUME OF MAIN FEATURES

A powerful and advanced home computer with 32K RAM as standard for £199, the Dragon offers a sophisticated specification and potential for expansion unequalled by most of its rivals.

Using the advanced 6809E microprocessor, the Dragon 32 offers:

professional quality keyboard - with typewriter layout and feel: guaranteed for 20 million key depressions

advanced graphics and sound with flexible, high-resolution, graphics definition

five levels of resolutions, nine colours, point-by-point drawing, lines, arcs, circles, irregular shapes and paint-in operation for solid areas

Microsoft extended colour Basic as standard; future expansion to include a second microprocessor, a disk operating system, other languages and other operating systems, powerful editing features

Other features include a musical ability which offers five octaves, 225 tones, 155 tempos and 31 volume levels, advanced cassette control features and the capacity for '3D' drawings.

Dragon users each receive a free 160 page manual which comprehensively covers every aspect of the machine's potential applications and gives many clearly explained examples to enable purchasers quickly to absorb the rudiments of computer operation and simple programming.
