

DRAGON SOFTWARE

Dear Dragon Owner,

We are pleased to present our first catalogue for 1985!

We are, as promised, expanding our range still further, which you will be able to see from this larger-than-ever brochure.

We have included many of the titles we were asked for and hope that you will continue to let us know which titles you would like to see included in future.

We are confident that this catalogue contains something for everyone, from games through to OS-9 Professional Software. We are keeping prices low and, where possible, are cutting them further.

To order, simply complete the enclosed order form and send it to us with payment. Your goods will normally be despatched within 2-3 days of receipt of order. Phoned credit card orders are welcome; for details please refer to the order form.

Please Note: This brochure supersedes any of our other brochures and in order to avoid disappointment, please check with us before sending in any order for items not included in this brochure.

Yours sincerely

OPERATION SAFRAS

T.9135 £5.95

GRAPHIC ADVENTURE

Join Rupert Pettigrew in his search for the mysterious Safras sword and the challenges that follow.

— Family Adventure packed with mysteries, puzzles, thrills and spills
— Stunning graphics and the most amazing sound effects.

'Well done to Shards on another great adventure' (TV Gamer, Sep 84)

Please note that where **1** appears throughout this brochure, joysticks are required for these programs.

MYSTERY OF THE JAVA STAR

T.9136 £5.95 GRAPHIC ADVENTURE

— Enormous 100K adventure (over 75K of graphics) in 4 parts. You have discovered an old map and a ship's log book, indicating the existence of magnificent treasures, including a mysterious ruby, the Java Star, aboard an 18th century sailing ship that sank in the Caribbean. You must mount an expedition, gathering all the necessary information, then search for the shipwreck and the hidden treasure.

SHAPER

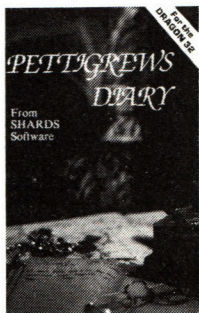

T.9137 £7.95 SOUND UTILITY

A comprehensive sound utility program for the Dragon 32. It contains a library of 100 different machine code generated sound effects which can be tested, examined or changed at will, then stored outside of BASIC, ready for use within your own program. As well as enabling you to simulate the sound of any musical instrument, the sound-building facility of Shaper will help you create a variety of unusual and weird effects; lasers, machine-guns, explosions, voice sounds, zip zaps, sirens, echoes, flying saucers, shell-shrills, ricochets, water-drips and frog croaks are some examples.

This package is designed both for the serious games programmer and the interested beginner.

THE YOUNG EDUCATIONAL SERIES

LET'S COUNT

L.30839 £5.49

J Optional

Let's Count is an easy program for early learners aged from 3-7. It introduces young children to simple counting and, using lively graphics and 4 simple teaching methods, makes counting from 0-9 fun to learn.

NUMBER CHASER

L.30849 £5.49

Number chaser is designed to develop those skills of estimation that children may not acquire when frequently using a calculator. Problems can arise in that children may have no idea of what the size of a multiplication will be. The aim of this program is to give children a 'feel' for numbers. Age range 7-10.

TABLE ADVENTURES

L.30845 £5.49

Table Adventures is a series of 4 exciting games which revise multiplication tables. Each is harder than the last with a self test program at the end, so you can check how you are improving. This taxes even an adult's brain. Age range 5-10.

CRANKY

L.30842 £5.49

Cranky is a pocket calculator with a difference. It has been designed specifically to introduce children to number patterns and relationships. The player must create a series of numbers, using 3 and 5, to form a pattern on a grid of numbers from 1 to 100. Age range 6-10.

FACEMAKER

L.30848 £5.49

Children from an early age are encouraged to draw and paint faces. This, while being great fun, encourages discussion about the human character and other related topics. Facemaker achieves this and helps improve the child's spelling and reading. Age range 4-8.

HIDE AND SEEK

L.30521 £5.49

An aid to education that makes learning fun. This program has been specially designed by experts to develop short term memory and reading skills in children aged between 4 and 11 and includes a range of difficulty levels.

SHAPE UP

L.30847 £5.49

Help Mr Brock the Badger carry different shapes and deliver them to the right place. The program helps the child to recognise and sort simple geometrical shapes in 4 different games. It gives an excellent introduction to shapes for the child's mathematics and language development.

NUMBER PUZZLER

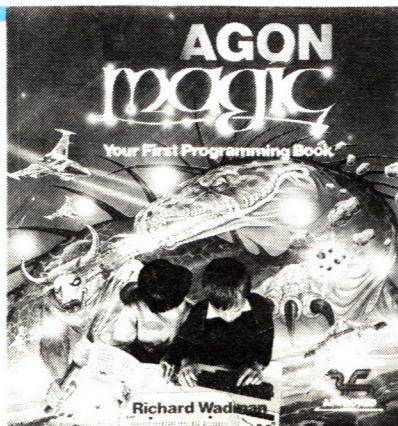

L.30519 £5.49

Designed by experts to develop children's powers of mental arithmetic, this program has a range of difficulty levels to suit children aged between 4 and 11. It makes learning a joy.

NUMBER GULPER

L.30517 £5.49

Designed to develop children's power of mental arithmetic while at the same time making learning enjoyable and fun to learn.

INSIDE THE DRAGON

FAC.100 £7.95

The most comprehensive book on the workings of the dragon currently available, among the topics covered are: The architecture of the M6809; programming the M6809; Input/Output hardware; Graphics hardware; Disk operating system; Data sheets for the M6809, the 74LS783 multiplexer and MC6847 video display generator.

DRAGON MAGIC

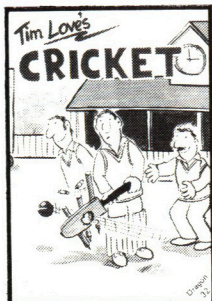

FAC.130 £4.95

A helpful first programming book which takes you through the workings of Dragon Basic.

Some more of your favourites

TIM LOVES CRICKET

T.9102 £8.95 FOR DRAGON 32 ONLY **J**
Tim Loves Cricket is the most realistic cricket simulation yet produced for any home micro. It simulates a 40 over match between two teams of any chosen standard. CHAMPIONS

T.9103 £6.95

You are the manager of a club in the Fourth Division of the Football League. The object of the game is to take your team to the 1st Division Championship and into the European cup. It features the transfer market, promotion, relegation, results, league tables, suspensions, injuries and all the fun and drama of managing a football club.

THE RETURN OF THE RING

T.9108 £9.95

100% machine code, this program is a brilliant blend of high resolution graphics and advanced routines that allow you to communicate with your computer in complete English sentences. Your goal? Return the Ring of Darkness to its creators on the hidden planet Ringworld.

'The best adventure/role play game that I have seen for the Dragon'
(Dragon User, Nov 84)

TUBEWAY ARMY

T.9100 £7.50 **J**

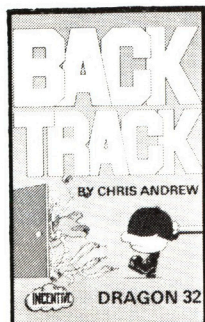

Fly your ship through the mountainous caverns, dodging or destroying the missiles, fireballs and drone ships. If you can navigate through the solid rock tunnel you get the chance to destroy the enemy base. Also includes speech.

BACKTRACK

T.9101 £6.50

Some of the best graphics seen on the Dragon featuring Eddie, a new comic character in serious trouble in the professor's labyrinth.

The HEWSON CONSULTANTS 3D Space Series

3D SEIDDAB ATTACK

T.9105 £7.95 

You are the commander of a modern tank or 'drone'. Your task is to patrol the city streets, destroying any Seiddab craft that venture within your range. You are armed with steerable laser bolts.

3D SPACE WARS

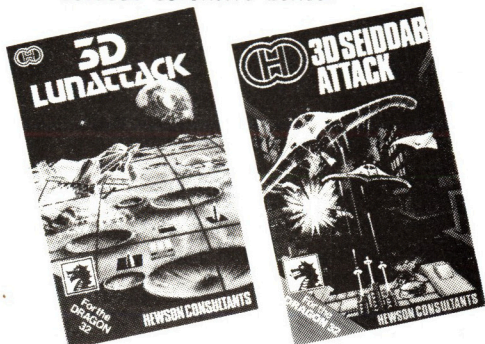

T.9106 £7.95 

You have assumed complete control of your world's last fighter-killer class spacecraft. It is only you who can prevent the ultimate disaster — the destruction of your civilisation by the Seiddab, an unscrupulous race of murderers intent on total control of your star system.

3D LUNATTACK

T.9104 £7.95 

Destroy the enemy Seiddab command base by penetrating three successive Seiddab defensive zones.

This well known game, complete with full instructions and computer demonstration for beginners. [Oasis]

HARERAISER

(Prelude) T.9121 £8.95 (Finale) T.9122 £8.95 PUZZLE

In August 1979, Kit Williams wrote a book called 'Masquerade' which started a treasure hunt for the precious prize 'The Jewelled Hare of Masquerade'.

Haresoft have purchased the hare and produced an intriguing puzzle of animated graphics and text. This time the hare has not been buried, the winner merely having to solve its location.

The program is in two parts, both now available from Touchmaster at £8.95 each. Both tapes will be needed to find the location of the treasure. Please note; 'Hareraiser' is a puzzle and not a game.

Dragon Data Titles ●●●●●●●●●●

ACTION

BUMPERS

M.30889 £3.95 J

Can you navigate successfully through the randomly generated maze? It's not that easy! The walls of the maze are invisible and contain booby traps; and can differ in size; all adding to the excitement in this highly tactical strategic game.

CIMEEON MOON

M.30882 £3.95

Fantastic '3D' graphics and surrealistic sound effects create this fast action game for the Dragon. Out in deep space, beyond the Cimeeon Moon, you are at last free from captivity in your cell on an alien Spaceship. But this is only the beginning...

ADVENTURE

SEA QUEST

M.30944 £5.49

An animated hi-res adventure. Brilliant graphics are featured in this under-water game where you are searching for hidden treasure.

VIKING

M.30879 £3.95

This is an 'exceptionally appealing' simulation of running a Viking holding around the year 700. The computer asks you a series of questions and the success of your holding depends upon your answers. Changes in weather, peasant revolts and natural disasters all become a challenge in your bid to become a Duke or even the King.

BLACK SANCTUM

M.30509 £2.49

Can you exorcise the evil spirits from the deserted monastery in this classic text adventure game? Look out for spooks and ghouls who will try to stop you doing so.

UTILITIES

DREAM

L.30516 £5.49

Dragon's assembler allowing the creation of text files and preparation and conversion to object code of assembler source programs for the 6809.

SYNTHET 7

M.30838 £3.95

Turn the Dragon keyboard into an effective music synthesiser. The screen display has a piano keyboard representation at the top, choice of organ stops and an envelope which can be tailored to your own taste. Histograms show the present state of the wide range of parameters and your efforts can be recorded directly onto tape.

SHAFT

M.30894 £3.95 J

The object of this game is to dodge lifts moving up and down the screen whilst trying to reach the other side. Once there you take the lift up to the next level and once more have to dodge the lifts. The goal in this difficult game is to reach the top of the screen. However, dodging the lifts is not as easy as it seems.

MOON HOPPER

M.30884 £3.95 J

In this exciting arcade game, you are an ace USSP Moon Hooper Controller, on routine lunar manoeuvres when you are attacked by hostile Traglans...

SHENANIGANS

M.30943 £5.49

Probably one of the best adventures seen on the Dragon. The objective is to discover a pot of gold at the end of the rainbow. Fine graphics and imaginative clues and conundrums make this program a must for adventure fans.

MONSTERS AND MAGIC

M.30880 £3.95

Before you set off to vanquish the Demon Lord your character must be created. There are 52 species of 'nasties' to conquer in this role playing adventure where both short and long expeditions are catered for.

CALIXTO ISLAND

M.30508 £2.49

A classic text adventure which takes you through a secret laboratory into new pastures with many treacherous obstacles in your attempts to find the lost treasure and return it to its rightful place.

DREAMBUG

M.30535 £3.95

Both disassembler and monitor facilities are available with Dreambug. A must for all serious machine code programmers, this program is designed to operate with DREAM.

LOGO

F.20311 £19.95

An educational language designed to let children begin by exploring, now being extensively used in schools. The learning process is centred around a 'turtle' shape on the screen which can be moved using simple program commands.

Great Games ~ Great Prices...

CASSETTES

POSEIDON ADVENTURE

M.30522 £1.99

A massive deep sea earthquake creates a tidal wave which capsizes a luxury liner you are travelling on. Can you escape from the ship in this ocean-going adventure game?

◆ **C COMPILER S.11094 £79.95** Requires

DD	D64	OS-9	Popt
----	-----	------	------

A system implementation language which offers software portability from your Dragon 64 up to UNIX(TM) main frame and vice versa.

◆ **BASIC 09 B.11002 £59.95** Requires

D	D64	OS-9	Popt
---	-----	------	------

A structured interactive compiler with PASCAL-like enhancements, allowing multiple, independent named procedures. Supporting byte, integer, real, Boolean and string data structures and three dimensional arrays with high speed, high accuracy, mathematical functions.

◆ **PASCAL S.11093 £79.95** Requires

DD	D64	OS-9	Popt
----	-----	------	------

A structured, modular language giving programmers an (almost) perfect medium for concise expressions of solutions to complex problems. The ability to use disk space as "virtual memory" allows programs much larger than available RAM to run. P-Code support allows for greater software transportability.

◆ **EDITOR/ASSEMBLER/INTERACTIVE DEBUGGER D.11047 £49.95** Requires

D	D64	OS-9	Popt
---	-----	------	------

Powerful yet comprehensive text preparation system. 6809 assembler incorporating functions for calling OS-9, generating modules and encouraging position independent code. It can also be used with PASCAL and C. The debugger, incorporating a calculator mode, can be used with system diagnostics, I/O testing, as well as 6809 code.

TOUCHMASTER

TOUCHMASTER is a revolutionary concept in computer peripherals – a touch sensitive pad which plugs simply into the computer and effectively bypasses the keyboard.

Of sturdy design, with an A4 work surface and superb 256 x 256 resolution, the TOUCHMASTER package provides all you need to get 'hands-on' experience without even fitting a plug! The unique technology used means that there are no switches to break, making TOUCHMASTER a robust and reliable machine.

Included in the package are the TOUCHMASTER, transformer, user guides, Multipaint program & overlay, and a stylus (just in case you don't want to use your finger!). With the Multipaint program you can quickly and easily draw on the overlay provided, with stylus or finger, in a resolution of your choice, and the drawing will be reproduced on the screen immediately. Not too sure of your free-hand drawing capabilities? Not to worry, Multipaint also provides functions to produce boxes, circles, triangles etc.

The finished drawing can easily be saved to tape, or disk if required as the interface still lets you use your drives.

Graphics are just one aspect of the TOUCHMASTER and there is a range of software – TOUCHWARE – available. Young children unable to recognise letters on a keyboard are not prevented from using TOUCHMASTER and there are a number of colour and shape recognition packages available for them. They can benefit from matching shapes and colours on the overlays provided with the TOUCHWARE range to those which appear on the screen simply at a touch.

It is easy to write programs for the TOUCHMASTER – if you can cope with joystick input you can handle the TOUCHMASTER input. A sample program is given in the user guide showing just how easy it is to include the TOUCHMASTER and it's many possibilities in your programs.

TOUCHMASTER is available now from Touchmaster Ltd for the price of **£149.95** – you just use the standard order form included in this brochure.

Also available for the BBC, CBM64, VIC20, SPECTRUM
